

EXDENSUR

(depemokimab-ulaa)
injection 100 mg

ULTRA- LONG-ACTING EXDENSUR

The first and only ultra-long-acting
asthma biologic **that's just**
2 doses a year*

*1 dose every 6 months.

APPROVED USE

EXDENSUR is an add-on, prescription maintenance treatment for patients 12 years and older with severe asthma, eosinophilic type. EXDENSUR is not used to treat sudden breathing problems.

Important Safety Information

EXDENSUR can cause serious side effects, including:

- **allergic (hypersensitivity) reactions, including anaphylaxis.** Serious allergic reactions can happen after you get your EXDENSUR injection. Contact your healthcare provider or get emergency help right away if you have any of the following symptoms of an allergic reaction:
 - swelling of your face, mouth, and tongue
 - breathing problems
 - fainting, dizziness, feeling lightheaded (low blood pressure)
 - rash
 - hives

Please see additional Important Safety Information throughout.
Please see full Prescribing Information, including Patient Information, for EXDENSUR at [EXDENSUR.com](https://www.exdensur.com).

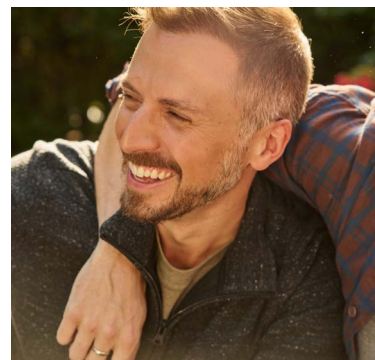

DOING EVERYTHING RIGHT BUT STILL DEALING WITH ASTHMA ATTACKS?

EXDENSUR
(depemokimab-ulaa)

Your current asthma treatments may not address the airway inflammation that could be causing your symptoms.

No matter how hard you work to prevent attacks, if you're not targeting a root cause of inflammation, the cycle of inevitable triggers and attacks may continue.

DID YOU KNOW?

Experiencing asthma attacks requiring steroid treatment or hospitalization **more than twice a year is a sign of uncontrolled asthma.**

More than 50% of patients with severe asthma were uncontrolled even while taking their regular maintenance treatments.

If repeated asthma attacks **are left unaddressed, it can make your asthma worse.**

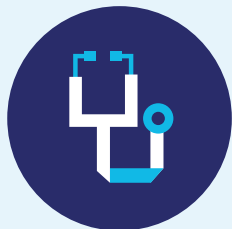

Important Safety Information (cont'd)

Before using EXDENSUR, tell your healthcare provider about all of your medical conditions, including if you:

- are taking systemic or inhaled corticosteroid medicines. **Do not** change or stop taking your corticosteroid medicines unless instructed by your healthcare provider because this may cause other symptoms to come back.

Please see additional Important Safety Information throughout. Please see full Prescribing Information, including Patient Information, for EXDENSUR at [EXDENSUR.com](https://www.exdensur.com).

WITH ASTHMA, THINK DIFFERENTLY

If you answer **YES**
to one or more of the
following questions,
**you may have
uncontrolled asthma.**

In the last year, have you had 2 or more
asthma attacks requiring oral steroids?

☐ **YES**

Is your asthma disrupting your sleep more
than twice a month?

☐ **YES**

Have you used your rescue inhaler more
than twice a week?

☐ **YES**

Have you visited an emergency room or been
hospitalized because of your asthma at least
once in the past year?

☐ **YES**

Important Safety Information (cont'd)

- have a parasitic (helminth) infection.

THE FIRST AND ONLY TWICE-YEARLY ASTHMA BIOLOGIC

EXDENSUR
(depemokimab-ulaa)

EXDENSUR is an add-on treatment that helps prevent asthma attacks with just 1 dose every 6 months.

THE MOST COMMON SIDE EFFECTS OF EXDENSUR INCLUDE:

Upper respiratory tract infection (common cold, sinus infection), sneezing, nasal congestion, runny nose and nasal itching (allergic rhinitis), flu or flu-like symptoms, joint pain, and sore throat (pharyngitis).

These are not all of the possible side effects of EXDENSUR. **Please see additional Important Safety Information throughout. Please see full Prescribing Information, including Patient Information, for EXDENSUR at EXDENSUR.com.**

Important Safety Information (cont'd)

- are pregnant or plan to become pregnant. Babies exposed to EXDENSUR before birth may have higher and longer-lasting levels of the medicine in their bodies. It is not known if EXDENSUR may harm your unborn baby. If you become pregnant while taking EXDENSUR, call 1-888-825-5249.

Please see additional Important Safety Information throughout. Please see full Prescribing Information, including Patient Information, for EXDENSUR at EXDENSUR.com.

PARTNER WITH YOUR DOCTOR

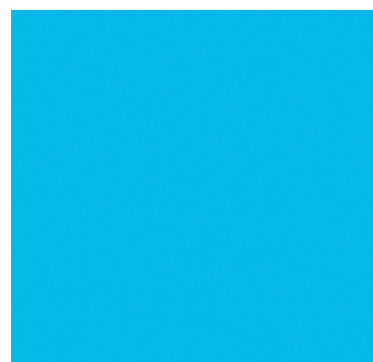

When discussing your symptoms and treatment with your doctor, here are some topics to discuss before considering EXDENSUR:

What is EXDENSUR?

Would EXDENSUR be right for me?

Can I take EXDENSUR with my other medications?

How do I receive EXDENSUR?

Important Safety Information (cont'd)

- are breastfeeding or plan to breastfeed. You and your healthcare provider should decide if you will use EXDENSUR and breastfeed. You should not do both without talking with your healthcare provider first.
